5/7/2024 10:28 PM	Historical	10:05:06 PM 5/7/2024 Banfield Follow-Up  Concern  Notes from telehealth CVT PerO- Jax feels hot and has not been eating. Very low energy. Looks like he has been scratching above where his umbilical hernia is at. Super irritated and scratchy like it has been bothering him.  Past few days P appetite has been decreasing only eats about 1/2 his dinner now no longer eat breakfast. Did V 1x a few days ago only. P has not had a recent fecal. No D. Poss fever, P will try to find cool area to lay on.  O worried umbilical hernia causing issue however in photo area is not bulging out as if fat or intestines maybe trapped in area. Poss some type of infection occurring due to fever. Rec f/u before P stop eating. In the meantime may offer bland diet to entice P to eat.  For telehealth-related concerns contact telehealth@Banfield.com				5264 Plymouth, MA
4/25/2024 3:39 PM	Plan		Arellano, M.			5264 Plymouth, MA
		Client notified re status SWO- Jax was so good for PE and corneal stain; both were unremarkable. Upon examination of left eye, a very small area of opacity noted on cornea (fibrosis), could have been an older scratch or wound to the eye that has healed, minor irritation around conjunctiva. Recommend trying course of topical antibiotic for a week, if Jax starts pawing or scratching at the eye, please get E-collar. If not improving after a week, Jax needs to be reevaluated.
